About 20 years

November 22, 2022

After requesting others to comment on what Manna has done for them, Steven wrote this to us today.

steven Mon, Nov 21, 11:43 PM (12 hours ago)

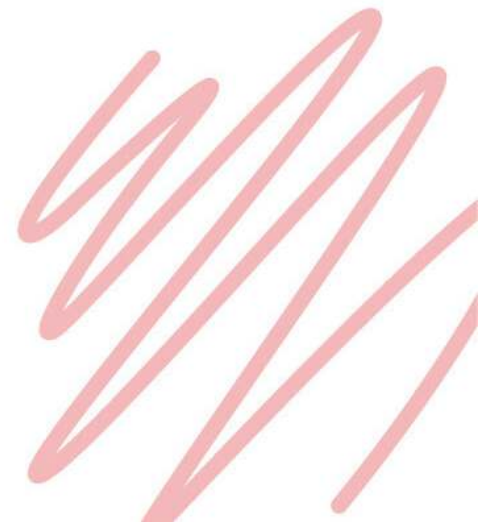

to me

thank you Thomas, i know it is a great product have been taking it for about 20 years.Love it! you should sell it on Amazon too!

Dave's Experience

November 19, 2022

Recently Dave replied to my note confirming his order. In that note I wrote, "I hope you find that Manna helps you as so many others have over the years."

His short reply was delightful to hear as not everyone shares their experiences. This is what Dave wrote!

Dave R

Nov 8, 2022, 8:47 PM (11 days ago)

to me

I have never been disappointed! Thank You!

Dave's reply meant a lot to me and is an encouragement to see if we can make Manna available to everyone. Soon we hope that Manna will be made available to everyone across the globe, through an affordable health care system, that everyone can afford. So thank you Dave for being part of this great adventure to heal our world.

A journey of a 1000 miles begins with the first step.
Until we get there, please walk with us by sharing your Manna experiences.
I hope to meet you soon.
Thomas

From Mike

August 12, 2022

Hello, reaching out to let you know i had a sachet i saved for when i caught covid. I wish i took it as soon as I tested positive, but today was day 3. For last three days my oxygen was hovering around 95 and my heart rate was 95bpm but i know from my fitbit and wearing a holter about two months ago my resting heart is about 60, so i was very aware of the constant high heart rate. I had a fever of about 102, aching body, some chest and nasal congestion. I went to dr and was given an inhaler and an antiviral. I did not like what i read about the antiviral and how it caused the virus to get replication errors because if it can do this to the virus- how do i know it doesnt do this to my own dna? Anyway- about 6 hours after my dose and resting my fever came down and my heart rate dropped down to the high 60s low 70s. I know it can take more time for the sachet to work, maybe its a coincidence, but i feel like it made a huge difference. I guess tomorrow will be the real test but i was a little concerned about my heart because i have ventricular hypertrophy and an atrial septal aneurysm. Seeing my heart rate come down close to normal was very reassuring. I guess my question i am wondering is how does a synthetic amino acid work to fight viruses/bacteria in the body? While i feel like it works and this is probably the 3rd or 4th i haves used in last 10-15 years, Thanks!

Almost a Miracle

June 1, 2021

I felt I should share with you some information I received from a health practitioner not long ago. Her son is autistic and she has found Manna to be very helpful.

I use Manna for years, but never could clearly understand the mechanism of action. Usually we use a lot of therapies for autistic kids, I was more concentrated on the dietary intervention, supplement, different antimicrobial therapies, chelation. I know about the damage of immune system of autistic kids. I consulted hundreds of parents during last 15+ years, only few of autistic kids were never vaxd. I used Manna for my own child since 2011 when he created very bad tantrum (self damaging behavior, scratching of others) after microcurrent treatment. I tried everything what I could imaging but nothing worked. I started his first Manna course and he become great child after very first dose. He developed high fever, he was very weak, he slept few hours during daytime (very unusual for him) and his tantrum disappeared. At that time it was very clear: Manna helped him. After it I started to use Manna regular 3 times/year. Again, we used a lot of others therapies. I saw some improvement in different areas after every course, but it was not the only therapy. After 6 years I stopped to use Manna on the regular basis for him. Once in 1.5-2 years he developed very aggressive behavior (the main component is scratching, he can scratch himself and/or someone near him), I tried different treatments, but only after Manna he stopped this distractive behavior. Mar 21 2021 he developed this problem again, for 10 days I tried everything. Only when I found Manna which I didn't use last year, his problems disappear. I was very busy with my exams and relocation, everything was very clear and looked very similar to our first experience: my child become very weak, he created some fever, slept during daytime.

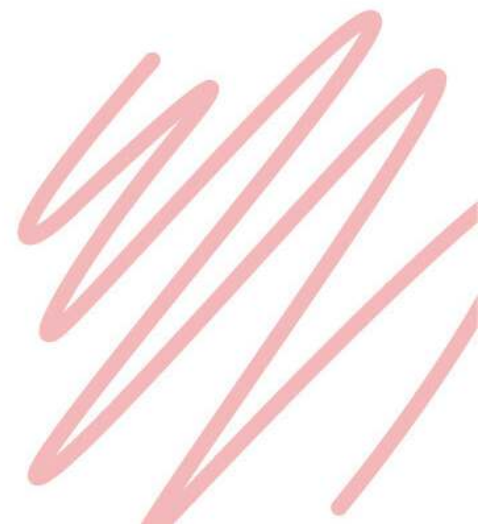

After it he became very nice child without very dangers behavior. He almost killed me this time, he is not small anymore, he is 20 years old. He created problems after vax but he also was diagnosed with Lyme in 2008. I never saw any die off effect after Manna, I fill like it does something with immune modulation. I may be wrong, it's just my subjective feeling. I will try to collect more information, but I am going to use it as a part of treatment plan, not as a single therapy. I am also going to encourage people to use Manna. You are absolutely right. We are going to deal with huge level of people with autoimmune problems.

Another note:

Thanks for the info! I explored so many different options over the last 18 years, but I can't compare anything with Manna. It looks like a miracle.

Wonderful

July 30, 2020

From Janet:

Manna has brought me back to life. I had become weak and very tired. 2 days after taking Manna I was cleaning my boat while anchored in the middle of the 420 acre lake I live on. I have been taking Manna every 3 months since then, and I am living life to the fullest. Manna is a naturally made healer that works for all, including my dog. Thanks to Manna I feel like a younger, more vibrant lady, keeping up with life.

Help for smokers.

July 24, 2020

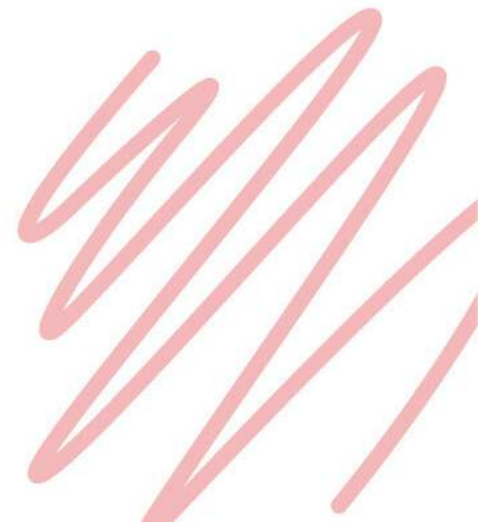

Hello Thomas, it worked miracles for my lungs and heart. For years I had serious health issues with my lungs and breathing while sleeping from all the years of smoking. All of that went away in just a few days.

I am also going to be ordering more this week.

Thank you for this miracle product.

Carlos

**Long time user
of Manna.**

July 7, 2020

Thank you so much for thinking of me- yes, I've been taking it for 15+ yrs, I buy it for me, my kids, grandkids, and always like to have it handy- I DO recommend it to many people every week- especially at this time- and will absolutely continue to order- thank you! D.

Amazing
!

April 28, 2020

A bar tender named Charlie from New York told me over the phone around 2013, that he had suffered from Lyme disease and was getting very tired. That would have been around about 2003. After hesitating to take it, and waiting about three months, he took the few drops in the bottle. He just had to use it. He felt he had nothing to loose. He was was so desperate, as his symptoms were getting worse, and he was tired all the time. He then told me, his health rapidly improved. His Mother, who was 85 at the time, was in the hospital with a flesh eating disease, and was not expected to live, so he gave her the manna he had left. In three days she was out of the hospital. Then he said, she is now 95 and touring Europe.

John's Manna Experience

April 7, 2020

Hello,

My name is John and I have been a customer for several years now. I have taken manna sachets annually (7 stretched out over 3 weeks annually) and have reaped incredible rewards. Prior to my using the peptides, i would get sick with chest infections, colds, the flu, etc at a minimum 4-6 times a year. After using manna sachet i get sick MAYBE once a year, and usually it signals that its been a year (almost to the date) since i used the sachets. Recently due to financial constraints and moving parts in my life, i have been off of the peptides for almost 2 years. I noticed the effects immediately. I was sick 3-4 times in the last 9 months, unheard of when i was using the sachets. I have just received my 7-pack and am excited to get healthy again.
